

KisanGat Premium UI/UX Design Brief

Project Overview

KisanGat is a modern Dairy Management ERP platform designed for dairy owners to manage milk collection, farmers, customers, inventory, payments, billing, reports, and operational analytics through a premium, user-friendly interface.

Design Style

Premium SaaS ERP design, modern dashboard-first experience, glassmorphism-inspired cards, subtle gradients, soft shadows, clean spacing, and enterprise-grade usability.

Color Palette

Primary Blue #2563EB, Indigo #4F46E5, Emerald #059669, Amber #D97706, Rose #E11D48, Violet #7C3AED, Background #F0F4FF, Surface #FFFFFF.

Typography

Plus Jakarta Sans for all interfaces. Large bold headings, medium-weight section titles, and highly readable body text.

Layout Direction

Left navigation sidebar, top utility bar, dashboard-centric content area, responsive card layouts, KPI-first information hierarchy.

Dashboard Structure

Hero greeting section, KPI cards, collection analytics, revenue analytics, inventory overview, customer dues, farmer payables, recent transactions, and operational alerts.

Component Design

Rounded cards, gradient action buttons, searchable dropdowns, smart forms, live calculations, interactive tables, status badges, timeline views, and analytics widgets.

Farmer Management UX

CRM-style farmer cards with collection statistics, earnings, payment history, activity status, and quick actions.

Milk Collection UX

Fast-entry workflow with Save & Add Next, smart auto-fill, automatic amount calculations, rate detection, and real-time summaries.

Payments UX

Auto-calculated farmer payouts, balance tracking, ledger-based accounting, payment timelines, and settlement workflows.

Settings UX

Organized configuration panels for dairy information, milk rates, preferences, notifications, and security settings.

Mobile Responsiveness

Responsive grid system, collapsible sidebar, touch-friendly controls, adaptive cards, optimized tables, and mobile-first workflows.

User Experience Principles

Reduce clicks, minimize repetitive entry, real-time feedback, contextual actions, clear error states, fast workflows, and operational efficiency.

Visual References

Stripe Dashboard, Linear, Notion, Vercel, modern ERP dashboards, enterprise SaaS products, and premium analytics platforms.

Future Enhancements

Dark mode, AI insights, predictive inventory forecasting, WhatsApp integration, advanced reports, and offline support.
